## Bit legends discord code

Would be nice to have one and maybe advertise this reddit in the game as it would be nice for people to share more suggestions and tips here :D. Great game so far but keep up the great work even though some of the store items are a bit pricey :3 source-codesource codeauthorDavid PierceNoneWant your finger on the pulse of everything that happens in tech? Thanks for the heads up! metadata I've seen a lot of people migrate there and I doubt this game is legitimate I hope they don't spend too much money if it gets taken down metadata I don't think they require spending any money and there's not much option for that either. So I know at least two of the game's previous whales have moved over. metadata is this game only on android? can't find it on apple app store metadata what the actual hell dude... a straight rip off of this game, the player interface and display of gear are exactly the same ... bro I don't want to go through all the grind again but I'll think about that game metadata I've been playing it for the last few days and it's really fun. The translations are pretty corny at times and it does rip off a lot of things straight from Bit Heroes but it also has a lot of things that it does much better. It's a nice time burner if you like this type of game but are tired of Kong ruining things. metadata for me, it gave 1300 null error reference exceptions on launch, so that didn't convince me very hard. Maybe I'll try it again later. Time with Bit Heroes is over for the time - unless Kongregate takes some big steps backwards. But that's unlikely. They won't be able to milk a dead cow anyway. metadata Kongregate had its chance and blew it, I've heard a lot of talk about this game also in guild discord. Sounds early but promising. It's still in beta, and there isn't an iOS version yet. But otherwise it's really fun from the first play. And doesn't cost an arm, legs and torso. Good time to get in at the beginning and end up a whale whale. metadata I've been playing it for a few days, and I think it's pretty fun. Very much the same but there is a class and talent tree as well. Since I'm out on resources (not paying outrageous prices they have now) I've only been doing the regen in bh the last few weeks and was looking for something else to play. metadata From what I've heard, it's buggy and some people sometimes lose their progress. But even though half the game is ripped from bh, the other half are fresh new ideas and metadata &gt; content &gt; 1300 null reference exception error Terrible. Hopefully Kong will use this time wisely to win the hearts of his fans before Bit Legends devs can fix their code and steal us away. metadata Definitely still early I think it's still technically in beta? But for beta surprisingly well done. My thing is that I play mostly on the iPad so they really need an iOS version :p but you can actually message the dev team and get an answer, as in the good ole days with juppio. metadata I just PM GM on FB and it is said that the iOS version is coming soon. Maybe a month. metadata meanwhile Bit Heroes devs do their best -
